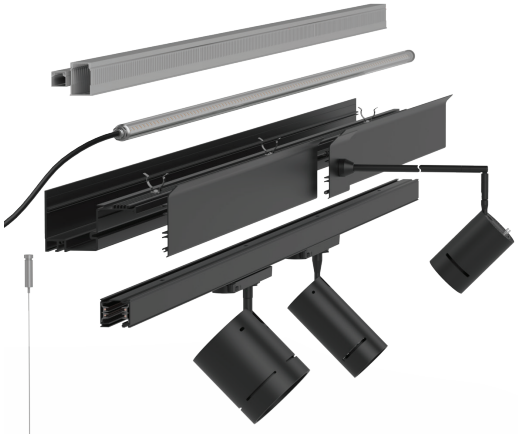
PRO4

SYSTEM

MULTI-PURPOSE PROFILE

rimani

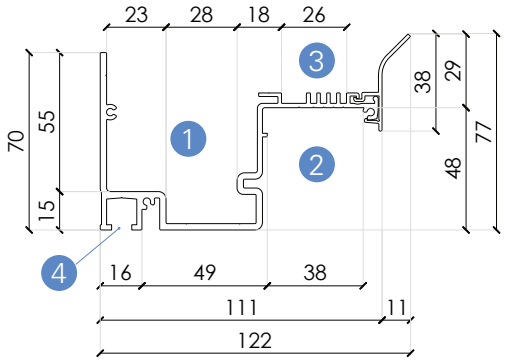


A product with 4 different functions
a multi-functional profile for direct and indirect lighting systems, hanging works of art, and housing cables

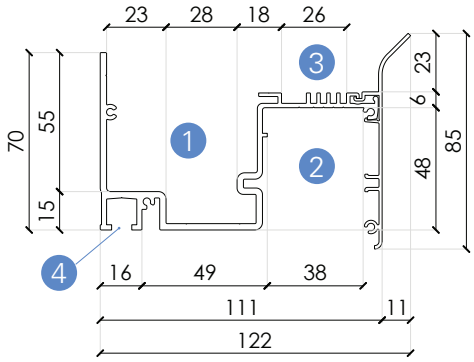
Installation flexibility
wall or surface installation

Tailor-made lighting system
profile length created specifically for each project

PRO4_1



PRO4_2



1 Cable duct: houses cables used for different purposes, such as voltage and power cables, telephone wires, computer network wiring, burglar alarm systems, ancillary systems, loudspeakers, etc.

2 Direct lighting: a unit houses an electrical track for adjustable spotlights / framers. The track can be mounted in the unit with the terminal parallel to the floor (PRO4-1) or perpendicular (PRO4-2). Alternatively, it may house a direct linear lighting system, fixed or adjustable.

3 Indirect lighting: on the upper side of the profile there is a finned guide that allows to fix the adjustable indirect lighting systems. The system does not have preset fastening positions and therefore guarantees users total freedom, even in the event of wall obstacles. The front panel allows the position of the indirect lighting appliances by hiding them from the view of visitors and avoiding potential glare.

4 Shaped track: for sliding grippers from which paintings and art-works, panels, billboards, objects can be hung

Fixing system: on wall through pre-spaced fixing holes or fixed on existing perimeter cornice

PRO4 lenghts: 1000mm / 2000mm; other lenghts upon request

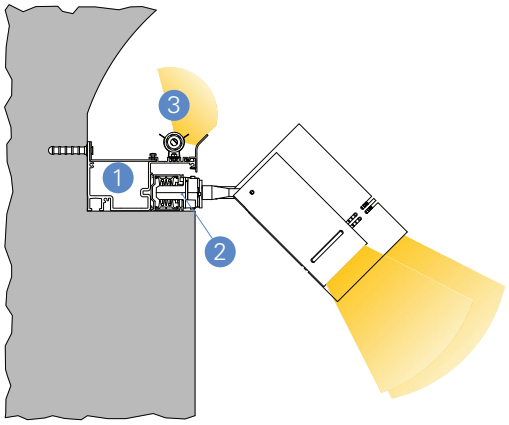
Accessories: mechanical joints, side closure caps, special ribberd profile for Solar 60 wall installation

Basic modul and ribbed profile are painted in matte white RAL 9010 or black RAL 9005; other RAL colors on request

Electrified tracks compatible with PRO4 system: 230V track, 48V track

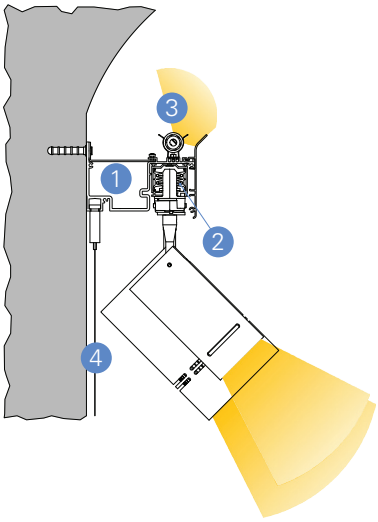
PRO4-1 weight: 2,12 Kg/m
PRO4-2 weight: 2,35 Kg/m

Examples of configurations



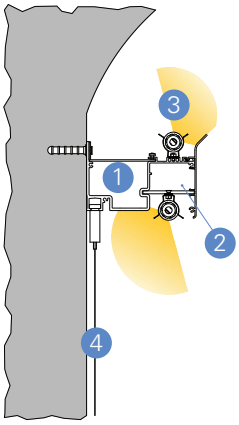
PRO4_1

1. Cable duct (power supply cables, telephone wires, computer network wiring, burglar alarm system, loudspeaker systems, etc.)
2. Compartment for electrified track installation for support and power supply of direct lighting devices, such as adjustable spotlights
3. Support surface for adjustable indirect lighting system



PRO4_2

1. Cable duct (power supply cables, telephone wires, computer network wiring, burglar alarm system, loudspeaker systems, etc.)
2. Compartment for electrified track installation for support and power supply of direct lighting devices, such as adjustable spotlights
3. Support surface for adjustable indirect lighting system
4. Shaped track for sliding elements from which can be suspended pictures, artwork, panels, posters and similar



PRO4_2

1. Cable duct (power supply cables, telephone wires, computer network wiring, burglar alarm system, loudspeaker systems, etc.)
2. Compartment for installation of direct linear adjustable lighting system
3. Support surface for adjustable indirect lighting system
4. Shaped track for sliding elements from which can be suspended pictures, artwork, panels, posters and similar
